

Oracle Database Administrator

Who we are and what we need

Company Description

Tradeware AG has established itself as a leading specialist in providing holistic services around Oracle database platforms.

With a clear "Customer First" strategy, we place our clients and their unique challenges at the heart of everything we do.

At Tradeware AG, we pride ourselves on:

- Delivering cutting-edge IT services and consulting.
- Optimizing Oracle database platforms for maximum efficiency and cost-effectiveness.
- Providing sustainable, economically viable, and technologically advanced solutions.
- Our office is located in the Zürich Metropolitan Area, we are building up a subsidiary in Bern.

Role Description

This is a role for an Operations-Oracle Database Administrator.

As a key member of our service organization, you will be responsible for delivering holistic Oracle database solutions, ensuring optimal performance, security, and reliability for our diverse clientele.

Work from home is acceptable in this position.

Key Responsibilities

- Provide 24/7 monitoring and support for client Oracle databases, ensuring high availability and rapid issue resolution
- Perform installation, configuration, and upgrades of Oracle databases across various platforms and versions
- Implement and manage disaster recovery solutions, including Data Guard and Active Data Guard
- Conduct regular performance tuning and optimization using tools such as AWR, ADDM, and SQL Tuning Advisor
- Execute database migrations and upgrades, including cross-platform migrations of large databases
- Implement and maintain Oracle RAC and ASM environments for high availability
- Develop and execute backup and recovery strategies using RMAN and other Oracle utilities
- Manage database security, including user access, encryption, and regular security audits
- Provide expert consultation on database design, normalization, and best practices
- Create and maintain shell scripts to automate routine DBA tasks
- Collaborate with client teams to troubleshoot and resolve database-related issues

Required Skills and Qualifications

Experience with Oracle Enterprise Manager or other monitoring tools

- Experience as an Oracle Operations-DBA with exposure to recent Oracle releases such as 12c/19c/23ai
- Strong analytical and problem-solving skills
- Fluent in German & English (Oral and written.) Level B2 for non native speakers
- Excellent communication skills and ability to work independently
- Valid work permit for Switzerland

Desired Skills and Qualifications

Education / Diploma as BSc, MSc or equivalent

- Knowledge of Oracle RAC, ASM, Data Guard
- Oracle Database Certification (OCA or higher)
- Experience with PostgreSQL databases
- Experience in performance tuning and workload management
- Knowledge of programming languages such as PL/SQL and Shell scripting
- Knowledge in automation and orchestration
- Knowledge of ExaData, Cloud at Customer and OCI infrastructure
- Familiarity with cloud migrations and management of Oracle databases in cloud environments
- Familiarity with UNIX/Linux operating systems
- Presentation / trainer skills -experience

We offer:

- A varied field of activity with your own area of responsibility
- An open and team-orientated working atmosphere
- Generous social benefits and further training opportunities
